Here,
lighting was given a color,
a thought,
a kind of state!

Grille lamp series

0.6mm
8
T8

Product features:

Light body material: light body USES the 0.6 mm high quality high strength steel plate, the rust removal, oil removal, rust, pensu processing, all in normal indoor use 8 years does not rust.

Adapter light source: T8 straight tube fluorescent lamp:

Electrical performance: with high quality electronic ballast or inductance, and adhering to its high power factor, low harmonic content.

Design features: chassis adopt bevel at the end of the new design, can match different types, different structure of the ceiling keel. Parabolic parabolic reflector design, comprehensive reflection, imported German or American anodized mirror or mist side aluminum manufacturing, long service life.

Application places: shopping malls, conference room, hall, etc., need to use smallpox modelling or continuous lighting places.
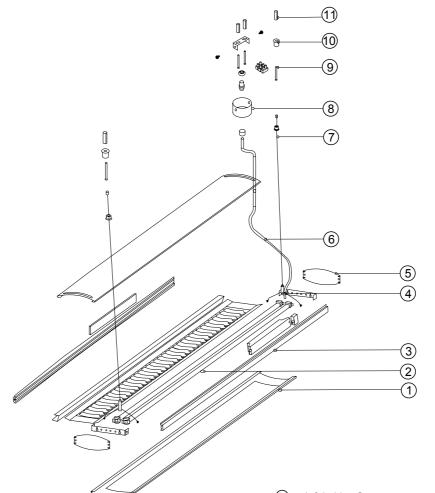

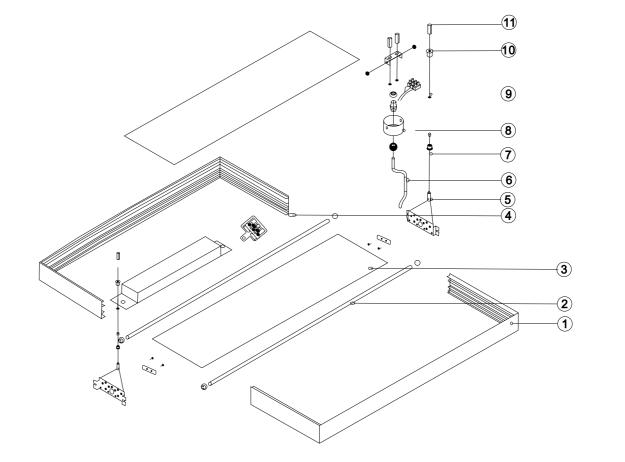

The clean and elegantlife
style deduces the deep
thought of life.

Grille lamp series

Office lighting series

Elegant color and texture, comfort and perfect generalization into a concise, elegant.

DETAILS
Determine success or failure
——

IP65
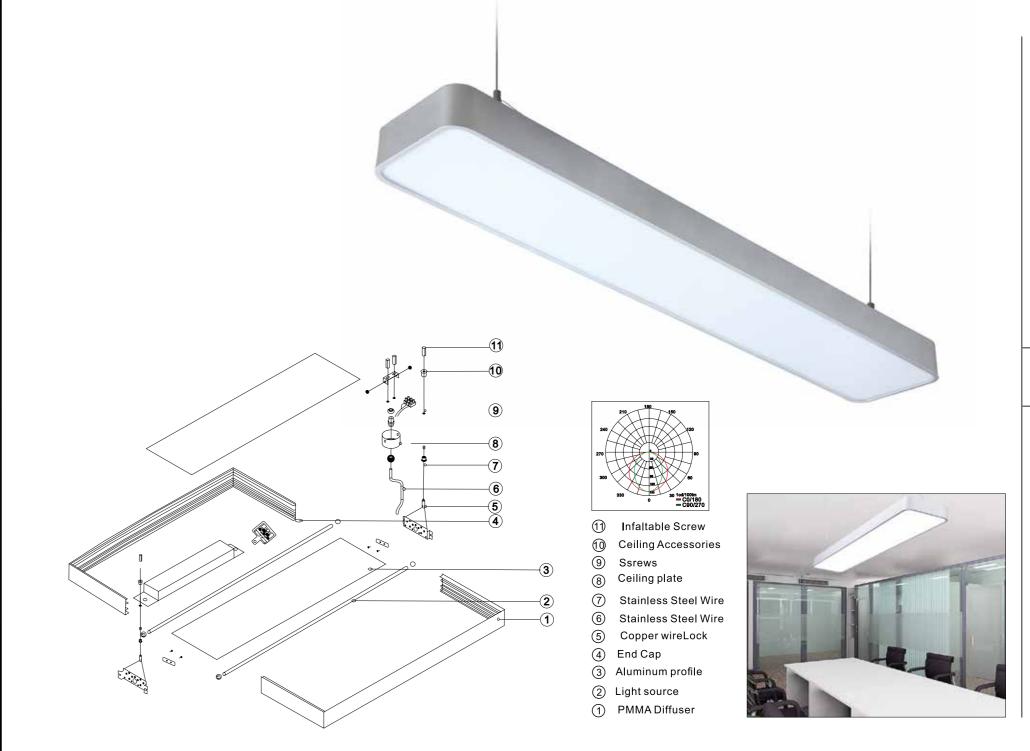

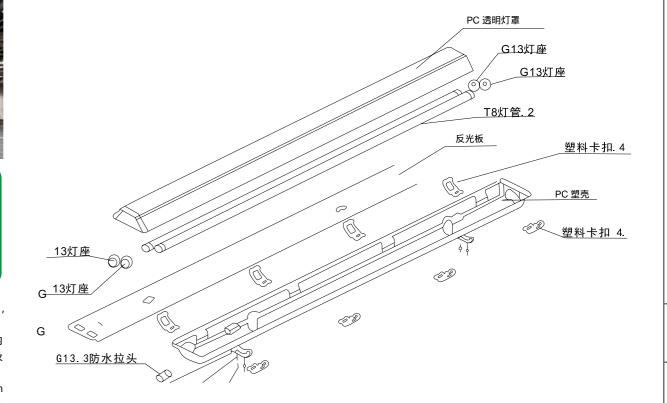

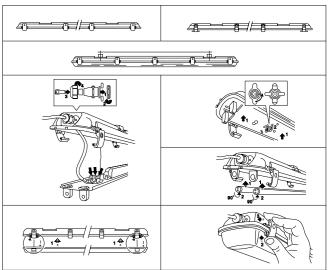

Three stents design beautiful and durable, perfect high pervious to light lamps, prism is designed, concentrated light, use convenient installation, has many characteristics, such as dustproof, waterproof, prevent the tube burst, protection grade reaches IP65, diversification of product installation: ceiling type, type suction a top, etc. Internal electrical appliances and accessories installation location accurate, beautiful, can choose inductor, electronic ballast and emergency power supply.

Apply to damp, dusty places, such as various powder finished semi- finished products factories, warehouses, cold storage, bath, sauna center, parking lots and city lighting environment optimization

Bracket series

0.5mm

PVC

Features:
   Elegant, luxurious and fashionable appearance treatment technology.
   New type ballast design, and features high light effect, low temperature rising, low noise, no strobe frequency, long life and low consumption.
   The durable and exquisite enclosure is made of 0.4mm imported quality cool casting plate.
   The surface applies advanced plastic casting treatment, with better performance in anti- rust and anti- corrosion as well as wearable than other brands
   Rotary lamp holder, convenient for installing the lamp, reliable contact.
   Streamline appearance and structure design, noble and elegant.
   The holder is made of high grade inflammable retardant PVC, the color will never fading, safe and beautiful.
